

## **Green Audit Activities**

The institution undertakes a series of structured Green Audit activities every academic year to promote environmental responsibility and sustainable campus practices. A major focus is on proper waste management, in which the **segregation of waste into biodegradable and non-biodegradable categories is strictly followed** across the campus. Dedicated dustbins are placed at key locations, and regular awareness drives are conducted to ensure compliance by students and staff.

**To minimize plastic pollution**, the Eco Club has installed a Plastic Bottle Collection Cage, where students responsibly deposit used plastic bottles. These collected bottles are periodically handed over to authorized recyclers, thus preventing plastic waste from entering landfills. Furthermore, the **college has developed a vermi-compost pit** where biodegradable kitchen and garden waste is converted into nutrient-rich compost, which is then reused for campus plantations.

The **Eco Club**, along with the **Beautification Committee**, plays a key role in maintaining the ecological health of the campus. Students actively participate in **plantation drives**, nurturing **saplings**, **watering plants**, and **beautifying green spaces**. The committee ensures regular **upkeep of trees, flower beds, potted plants, and herbal gardens**, contributing significantly to a clean, green, and aesthetically pleasing environment.

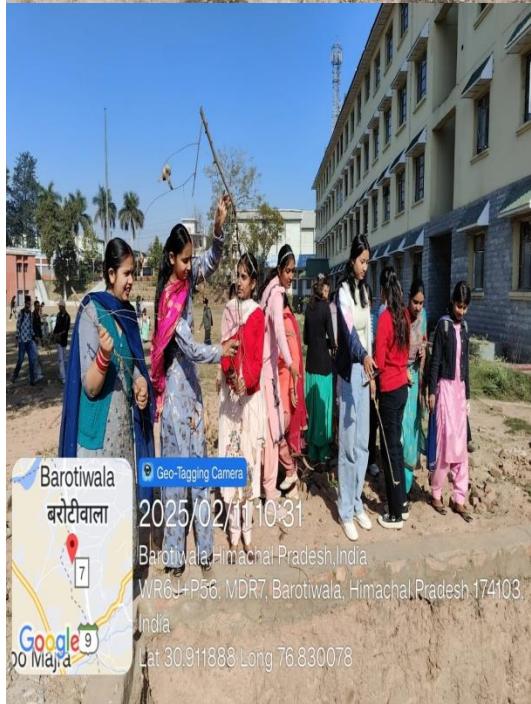

Through these initiatives—waste segregation, plastic bottle collection, composting, plantation drives, and green maintenance—the institution continues to build a sustainable, eco-friendly, and environmentally conscious campus culture.
